

ADHIMULAM BHARGAV SAI VISWANATH

AI Engineer Intern @ Paytm | B.Tech CSE (AI & ML) Student at VVIT | Aspiring AI Engineer

Phone | Email | LinkedIn | GitHub | CodeChef | Portfolio | 📍 Tenali

About Me:

AI/ML student with hands-on experience in building data-driven systems including ML pipelines, constraint optimization, and NLP workflows. Passionate about solving real-world problems through AI and scalable intelligent solutions.

Skills:

- **AI & Machine Learning:** ML (Regression, Decision Trees, K-Means – Scikit-learn), DL (CNNs using PyTorch), NLP (Text Preprocessing, Stemming), Constraint Satisfaction Problems, Exploratory & Explanatory Data Analysis (Pandas, NumPy, Matplotlib)
 - **Programming & Tools:** Python, Java, C, SQL, Git, GitHub
 - **Core Computer Science:** Data Structures & Algorithms, Database Management System, Operating Systems, Computer Networks
 - **Web & Deployment:** HTML, CSS, JavaScript, Responsive Web Design, GitHub Pages Deployment
 - **Soft Skills:** Problem Solving, Team Leadership, Collaboration, Presentation Skills
-

Experience:

- **AI Engineer Intern | Paytm | Internship | (Jun 2026 – Present)**
 - Working on real-world AI workflows, data-driven systems, and problem-solving in a fintech environment while gaining exposure to industry practices.
 - **AWS Cloud Computing & DevOps Intern | APSSDC x AWS Academy | GitHub | (May 2026 – Present)**
 - Gaining hands-on exposure to AWS cloud infrastructure, Linux, deployment workflows, and DevOps fundamentals.
 - **AI-HUB@VVIT | Apps Developer & Frontend Designer (UI/UX) | Website | GitHub | (Jan 2025 - Present)**
 - Contributing to AI platform development, UI/UX design, and deployment of student-led AI solutions.
-

Projects:

- **LipiSathi: Internet-Free Transliteration | DL, OCR, Image Processing | Team Lead | GitHub | (2025–Present):** Developing an **offline multilingual transliteration system** for street signs using **OCR**, image processing, and deep learning–based transliteration pipelines. Attained **~80–90%** text extraction accuracy and **~95%** transliteration accuracy while designing scalable support for all **22** official Indian languages.
 - **Automated AI Timetable Generation | AI Constraint Satisfaction Problem | Live Demo | GitHub | (2025-2026):** Designed and implemented a constraint satisfaction–based **scheduling system** to automate academic timetable generation using structured multi-sheet datasets and real-world allocation constraints. Generated **optimal** conflict-free timetables in **~0.3–0.4** seconds through constraint validation and feasible-solution evaluation.
 - **Custom NLP Stemming Engine | NLP - Text Preprocessing Pipeline | GitHub | (2025):** Created and implemented a modular **rule-based** stemming engine using ordered **linguistic transformations** including irregular verb normalization, suffix stemming, adjective reduction, and noun singularization. Achieved **~95%** stemming accuracy through extensible grammar-aware preprocessing workflows.
 - **Bus Service Prediction System | ML - Prediction | GitHub | (2024):** Built and evaluated ML models (Random Forest, Decision Tree, Linear Regression) for bus demand and fare prediction using preprocessing and feature engineering, achieving an best **R² of 0.96** with **Random Forest**.
 - **Amazon Product Trend Analysis | Web Scraping | GitHub | (2024):** Scraped and analyzed Amazon product datasets using Python to identify **price trends**, **review popularity patterns**, and **rating-price correlations** through EDA and visualization.
-

Education:

- **B.Tech – CSE (AI & ML) | Vasireddy Venkatadri Institute of Technology (VVIT) | 2023 – 2027**
 - 📍 Namburu | CGPA: **8.36/10.0** (up to III-I)
 - **Intermediate – MPC | Sri Chaitanya Junior College (SCJC) | 2021 – 2023**
 - 📍 Tenali | Marks: **939 / 1000**
 - **SSC (10th Class) | Viveka High School (VHS) | 2020 – 2021**
 - 📍 Tenali | Marks: **600 / 600**
-

Certifications:

- Deep Learning Fundamentals Lab – WorldQuant University (2026)
 - AWS Academy Cloud Foundations – 2026
 - Generative AI – Google Cloud Skills Boost (L4G), 2024
 - Remote Sensing & GIS – IIRS (ISRO) Summer School, 2021 (*Score: 131/140*)
 - **Additional Profiles:** [Google Cloud Skills Boost](#) | [Credly](#)
-

Workshops & Training:

- RHCSA Workshop (Phase1 & Phase2) - VVIT x Red Hat (2025)
 - Data Analysis Using Python – APSSDC, VVIT Google CodeLab (2024)
-

Achievements:

- Smart India Hackathon (SIH) - National **WR 6 (Top 7)**; Internal (VVIT) **Top 50/256+** teams (2025)
 - **First Prize**, Hologram Project – VVIT Science Exhibition (2023)
-

Positions of Responsibility:

- **Class Representative (CR), Dept. of CSM, VVIT (2023–Present):** Acted as a communication bridge between faculty and students while coordinating academic activities.
