

ADHIMULAM BHARGAV SAI VISWANATH

| B.Tech CSE - AI & ML Student at VVIT | Aspiring AI Engineer | Passionate about ML & DS |

Phone | Email | LinkedIn | GitHub | CodeChef | Portfolio | 📍 Tenali

About Me:

AI/ML student with hands-on experience in building real-world systems including constraint-based timetable generation and NLP pipelines. Passionate about applying machine learning to solve practical problems and seeking opportunities to contribute to impactful AI solutions.

Skills:

- **AI & Machine Learning:** ML (*Regression, Decision Trees, K-Means – Scikit-learn*), DL (*CNNs – PyTorch*), NLP (*Text Preprocessing, Custom Stemming Engine*), Constraint Satisfaction Problems (*Timetable Optimization*), EDA (*Pandas, NumPy, Matplotlib*)
 - **Programming & Tools:** Python, Java, C, SQL, Git, GitHub
 - **Core Computer Science:** DSA, DBMS, Operating Systems, Computer Networks
 - **Development:** Frontend (*HTML, CSS, JavaScript*), Responsive Web Design, GitHub Pages Deployment
 - **Soft Skills:** Problem Solving, Team Leadership, Collaboration, Presentation Skills
-

Experience:

- **AWS Cloud Computing & DevOps Intern | APSSDC x AWS Academy | GitHub | (May 2026 – Present)**
 - Working on AWS Cloud Computing, Linux, & DevOps fundamentals through hands-on infrastructure and deployment tasks.
 - Gaining practical exposure to EC2, SSH, NGINX configuration, and static website deployment workflows.
 - **AI-HUB@VVIT | Apps Developer & Frontend Designer (UI/UX) | Website | GitHub | (Jan 2025 - Present): Student-driven AI community at VVIT dedicated to leveraging AI through collaborative development and open-source contributions.**
 - Founding member contributing to the growth of the AI-HUB platform from GitHub Pages to a custom-domain AI ecosystem.
 - Developed and deployed the Automated AI Timetable Generation system while contributing to AI platform UI/UX.
 - Collaborating with 20+ VVIT students, alumni, and peers across hackathons and continuous platform development.
-

Projects:

- **LipiSathi: Internet-Free Transliteration | DL, OCR, Image Processing | Team Lead | GitHub | (2025–Present):** Developing an **offline multilingual transliteration system** for street signs using **OCR**, image processing, and deep learning–based transliteration pipelines. Attained **~80–90%** text extraction accuracy and **~95%** transliteration accuracy while designing scalable support for all **22** official Indian languages.
 - **Automated AI Timetable Generation | AI Constraint Satisfaction Problem | Live Demo | GitHub | (2025-2026):** Designed and implemented a constraint satisfaction–based **scheduling system** to automate academic timetable generation using structured multi-sheet datasets and real-world allocation constraints. Generated **optimal** conflict-free timetables in **~0.3–0.4** seconds through constraint validation and feasible-solution evaluation.
 - **Custom NLP Stemming Engine | NLP - Text Preprocessing Pipeline | GitHub | (2025):** Created and implemented a modular **rule-based** stemming engine using ordered **linguistic transformations** including irregular verb normalization, suffix stemming, adjective reduction, and noun singularization. Achieved **~95%** stemming accuracy through extensible grammar-aware preprocessing workflows.
 - **Bus Service Prediction System | ML - Prediction | GitHub | (2024):** Built and evaluated machine learning models including Random Forest, Decision Tree, and Linear Regression for predicting bus passenger demand and ticket pricing using preprocessing, feature engineering, and regression techniques. **Random Forest** accomplished the best performance with an **R² score of 0.96**, and was selected as the final prediction model.
 - **Amazon Product Trend Analysis | Web Scraping | GitHub | (2024):** Scraped and analyzed Amazon product datasets using Python to identify **price trends**, **review popularity patterns**, and **rating-price correlations** through EDA and visualization.
-

Education:

- **B.Tech – CSE (AI & ML) | Vasireddy Venkatadri Institute of Technology (VVIT) | 2023 – 2027**
📍 Namburu | CGPA: **8.36/10.0** (up to III-I)
 - **Intermediate – MPC | Sri Chaitanya Junior College (SCJC) | 2021 – 2023**
📍 Tenali | Marks: **939 / 1000**
 - **SSC (10th Class) | Viveka High School (VHS) | 2020 – 2021**
📍 Tenali | Marks: **600 / 600**
-

Certifications:

- Deep Learning Fundamentals Lab – WorldQuant University (2026)
 - AWS Academy Cloud Foundations – 2026
 - Generative AI – Google Cloud Skills Boost (L4G), 2024
 - Remote Sensing & GIS – IIRS (ISRO) Summer School, 2021 (*Score: 131/140*)
 - **Additional Profiles:** [Google Cloud Skills Boost](#) | [Credly](#)
-

Workshops & Training:

- RHCSA Workshop (Phase1 & Phase2) - VVIT x Red Hat (2025)
 - Data Analysis Using Python – APSSDC, VVIT Google CodeLab (2024)
-

Achievements:

- Smart India Hackathon (SIH) - National **WR 6 (Top 7)**; Internal (VVIT) **Top 50/256+** teams (2025)
 - **First Prize**, Hologram Project – VVIT Science Exhibition (2023)
-

Positions of Responsibility:

- **Class Representative (CR), Dept. of CSM, VVIT (2023–Present):** Connected faculty & students
